Re ERRATA - Draft for Stakeholder Information – May 9, 2008

***Draft Nova Scotia Offshore Petroleum Drilling and Production
Regulations***

***Draft Newfoundland Offshore Petroleum Drilling and Production
Regulations***

On 9 May 2008, the Frontier and Offshore Regulatory Renewal Initiative Steering Committee released, for stakeholder information, updated versions of the Draft *Drilling and Production Regulations*, dated 9 May 2008.

Revisions made to one draft provision were inadvertently left out. In the two Offshore Accord Act versions of the draft regulations (above), Section 74(2) should be replaced with:

Rest Period

74. (2) The operator may allow a person to work in excess of the hours or without the rest period referred to in subsection (1) if the operator has assessed the risk associated with the person working the extra hours and determined that such work can be carried out without increased risk to safety or to the environment.
